Medco manages your prescription drug benefit at the request of your health plan.

**Preferred Prescriptions®** is a list of medications that may be covered under your prescription drug plan.<sup>1</sup> This list was reviewed by an independent group of practicing doctors and pharmacists, and it contains medications made by most pharmaceutical manufacturers. It includes medications for many covered conditions.

### **SAVING MONEY ON PRESCRIPTIONS**

Your plan may prefer some medications over others. These are called *preferred drugs*, and their co-payment is lower.

*You may pay:*

- Lowest co-payment for generic drugs
- Higher co-payment for preferred brand-name drugs
- Highest co-payment for nonpreferred brand-name drugs

**Your doctor may be able to help you save money by prescribing generic and preferred brand-name drugs if appropriate. So be sure to bring this guide with you on every visit to your doctor. Some commonly prescribed nonpreferred drugs are also listed in this guide for your reference.**

**Please note:** This guide does not contain a complete list of preferred and nonpreferred drugs. It only lists the *most commonly prescribed drugs*. For an updated and complete listing of your prescription benefit, you can visit the “Benefit Highlights” section of our website—**www.medco.com**—and click on the View your preferred drug list link.

### **FINDING MEDICATIONS WITH LOWER CO-PAYMENTS**

This guide lists medications two ways to help you find some generic, preferred, and nonpreferred brand-name drugs.

#### **SECTION I - ALPHABETICALLY BY DRUG CATEGORY (SUCH AS RESPIRATORY)**

Within each category, medications are listed in alphabetical order, with generic, preferred brand-name, and nonpreferred brand-name drugs sorted separately:

- G      Means a preferred generic medication  
P      Means a preferred brand-name medication  
NP     Means a nonpreferred brand-name medication

#### **SECTION II - ALPHABETICALLY BY BRAND NAME**

After each nonpreferred brand-name drug, you will find possible generic and preferred brand-name alternatives.

### **SAFETY CONSIDERATION SYMBOLS**

Here is a quick guide for you and your doctor, which explains our safety symbols. These symbols appear next to certain medications.

- ↓      Means that a dose lower than the manufacturer's guidelines is often recommended for people 65 and older.  
▲      Means that use by people 65 and older is associated with increased risk; safer alternatives may be available. If used, the dosage should generally be lowered.  
🤰      Means weigh risk of birth defects or other adverse outcomes.  
🚫      Means do not use in pregnancy.

*This information was in effect at the time of printing and may be subject to change.*

<sup>1</sup> In some cases, your health plan may not cover certain medications listed in this member guide.
